DETAILED ACTION

This is in response to amendment filed on 1/5/07 in which claims 1-25 are pending. The applicant's arguments have been fully considered therefore this case is in condition for allowance.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: Comparing an expected value for at least one of said aspects of said electromagnetic wave along at least one of said signal paths with an actual value for said aspect of said electromagnetic wave along said at least one signal path to generate a correction signal; and applying said correction signal to at least one other aspect of said electromagnetic wave as recited in claim 1. Comparing said actual phase value with an expected phase value to determine any delay in an analog portion of said phase path in relation to said amplitude path; generating a correction signal based upon said comparison; and using said correction signal to adjust said amplitude aspect of said signal as recited in claim 10. Comparing said digital value with an expected value to determine any delay in an analog portion of said signal path relative to said separate signal path, generating a correction signal based upon said comparison, and using said correction signal to adjust said other aspect of said signal as recited in claim 15. A digital phase locked loop for comparing said value with an expected value to determine any delay in an analog portion of said one signal path relative to said separate signal

path, and to generate a correction signal based upon said comparison; and a bank of pipeline registers for adjusting said separate signal path as recited in claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
